Main challenges

- Administrative capacity (late Conferral of management - April 2013, not enough employees)
- Overall low visibility of the Network
- Inactive members (NSU initiates all activities)

Is the NRN beneficial for the implementation of the IPARD?

Benefits coming from networking

- **Shared knowledge & new perception-** participation in NRN meetings, other ENRD activities...
- **Connections-** inside the network but also with other networks
- **Advice-** great way to find expertise that you wouldn't otherwise be able to get
- **Positive influence**

Lessons learnt

- Change in the structure of the Network
- Improve the Network's identity
- Define clear role of NRN structures (what is the role of members, Steering Committee, NSU?)
- Set clear objectives and relevant activities for the Network right at the beginning of the implementation of RDP 2014-2020

Future plans/needs 2014-2020

- In order to ensure continuity in the work of the Network- „old” Network will be continuing its activities
- More cooperation activities
- Knowledge transfer for NSU staff and members
- Create a critical mass of stakeholders to increase value of network

Thank you!
