

## Formal and informal coordination mechanisms

Elena Saraceno, ENRD CP

Thematic Group on 'Improving RDP implementation' 2<sup>nd</sup> Meeting

Brussels, 7 May 2015

#### **Recommendations of 1st meeting**

- Good practices of Monitoring Committees (establishment, participation, organisation)
- Stakeholder participation mechanisms in measure design and implementation
- Stakeholder participation in designing the delivery process

All require both formal and informal coordination mechanisms

# Formal coordination: strengthening partnership + representation

- New for 2014-2020 ESI funds
- For national level, with regional and local levels (vertical) and with stakeholders (horizontal)
- Has legitimacy and checks & balance objectives
- Has legal support: Regulation, Contract
  Agreement, Code of Conduct, ECA report on
  Technical Assistance (NRNs & ENRD)
- A disputed aspect because of political content

# Italy's NRN: an example of good practice (ECA)

- Acting at national and regional / local level
- Offering formal and informal support to MAs and stakeholders, capacity building, participating in negotiations at all levels, animation and information tasks
- Not limited to Leader management and local projects, know-how on all RDP measures and delivery

### What can be done at this stage to strengthen formal coordination?

- Making a diagnosis of what has not worked well in the past, and define NRN contribution
- Making sure NRN's have a role to play, in formal and informal coordination of MCs tasks (mandate?)
- Give voice and facilitate exchanges between SHs
- Contribute to task-forces, subcommittees, reports
- Have a voice in selection criteria (and their revision), application procedures
- In complying with agreed objectives and targets

#### Informal coordination

- Necessary but not sufficient by itself
- Has to be accepted and legitimized by MAs, stakeholders
- NRNs animation and assistance with Leader is a valuable experience, to expand and build upon
- Important role in <u>all stages</u> of the implementation cycle: preliminary work and accompanying formal coordination
