## OBJECTIVE

### Initial position / background / local context of the proposed project (max 800 characters)

*The starting situation or local context in which the projects is going to operate*

In our area of Local Development Strategy there are 45 thousand inhabitants. The area is partly characterised by traditional agriculture and partly it is a small town with a historic downtown and rural areas with mostly dormitory town function (for people from Toruń). One of the greatest issues is a pollution, coming from agricultural production, means of transport, inappropriate waste management and use of heating units which do not meet environmental norms.

There have been promoted renewable energy sources for a last few years, eg network of solar panels on the residential and public buildings, LED illumination and aquisition of wind power. However, high cost of renewable sources of energy and a low level of environmental consciousness among inhabitants lead to marginalization of such pro-environmental actions. Hence, the necessity of actions in the field of environmental awareness and an increase of pro-environmental solutions which can reduce water, air and soil contamination, help in saving the energy, decrease the waste production and so on.

### Proposed objectives / target group and activities (max 800 characters)

- The increase in the awareness of the inhabitants of our LDS area in the field of environmentally sustainable managing of natural resources,
- development of pro-environmental attitudes,
- popularization of ecological solutions and a growth of usage of renewable sources of energy.
- engaging in actions promoting protection of natural environment and effects of climatic changes.
- exchanging the experiences between LAGs and developing good practices.

### Country and /or kind of partner you are looking for (ALL EU in case the interest is on any EU country)

Finland, Sweden, Denmark, Netherlands, Poland.

### Languages spoken by your LAG staff
