

Background

National Rural Networks (NRNs) have proved to be a useful component of rural development policy in 2007 – 2013. Building on positive experiences, the establishment and operation of National Rural Networks will continue in the next programming period.

NRNs are supported by the EAFRD either inside a territorial rural development programme (RDP) or as a separate National Rural Network Programme - NRNP.

They are subject to evaluation, as all other rural development interventions financed by the EAFRD, in order to demonstrate their contribution to the EU rural policy objectives and the development of rural areas.

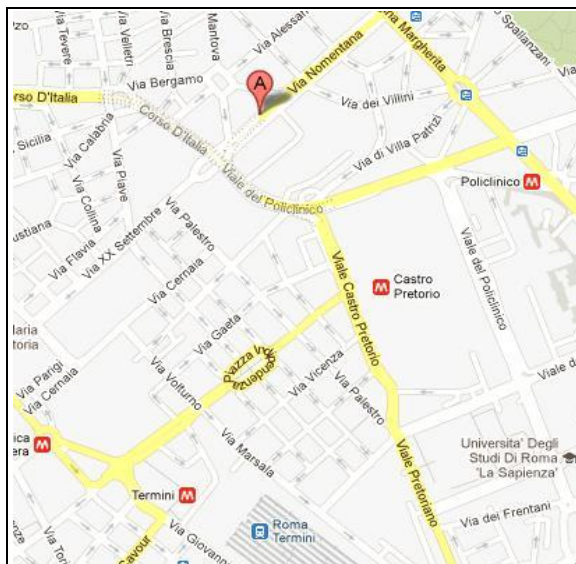

To enhance capacities in the evaluation of rural networks the Helpdesk of the European Evaluation Network for Rural Development is organising this interactive workshop which will provide an opportunity for participants to discuss and exchange experiences, information and knowledge on how achievements of rural networks and results/impacts of their activities can be assessed both in relation to the *ex post* evaluation of the 2007-2013 programming period, and in the 2014-2020 programming period.
