

### Workshop 3: Pathways for semi-subsistence farmig: Intergration in to the food chain, diversification

- What are the main barriers to diversification and how can they be overcome:
  - on-farm agricultural diversification
  - using farm assets for non-farm purposes (tourism, crafts)
  - through off-farm based activities (pluriactive arrangements in any sector)?
- In what ways can the barriers to participation in the food chain (e.g. high transaction costs and inability to meet agricultural standards) be overcome?
  - Can local/niche products be turned into commercial assets? What markets can they meet?
  - Are SSF well-placed to develop organic farming and could they reach the markets for these types of products?

### Workshop 3: Pathways for semi-subsistence farmig: Intergration in to the food chain, diversification

- In what circumstances should diversification or farm restructuring be actively encouraged?
- What role can cooperation between semi-subsistence farmers play and can it be enhanced?
