

CLLD in Poland - Coordination of Funds

Dijon, 27 November 2013

- Possible implementation of single or multi-funded local development strategies (1 area - 1 LDS - 1 LAG)
- Key challenge – development of common mechanisms enabling LAGs to grant and settle aid in the same way, regardless of the CSF fund used to finance the project

Coordination mechanisms

- key role of **Voivodship Self-Governments** in the CLLD implementation process
 - Managing Authority for ERDF and ESF
 - Implementing Institutions for EAFRD and EMFF
- joint LDS selection committee established by relevant MAs at the regional level
- common procedures and criteria for LDS selection

- joint calls for proposals and selection process
- Voivodship Self-Government as the only institution validating LDS selection
- coordination of preparatory support
- horizontal rules governing the implementation of CLLD in Poland will be prepared by the Ministry of Agriculture and Rural Development in close cooperation with the Ministry of Regional Development

Thank you for your attention!
