

## Transizione verso un'economia verde

La politica di sviluppo rurale ha un ruolo fondamentale da svolgere nel sostenere la transizione verso un'economia verde, dove la crescita economica è legata a doppio filo alla sostenibilità sociale e ambientale. Per saperne di più si veda [Rivista rurale dell'UE - Numero 23](#) [1].

### Definizione di “Economia verde”

“Un'economia che mira ad aumentare il benessere del genere umano, riducendo le disuguaglianze nel lungo termine e non esponendo le generazioni future a significativi rischi ambientali e a scarsità di risorse naturali.”

Programma per l'Ambiente delle Nazioni Unite (UNEP)

I Programmi di sviluppo rurale (PSR) possono sostenere nelle zone rurali **investimenti a basse emissioni di carbonio, efficienti sotto il profilo delle risorse e socialmente equi**, nonché una **gestione sostenibile delle risorse naturali** in un'ampia gamma di settori economici.

Per sfruttare appieno tutte le potenzialità offerte dal passaggio a un'economia verde sarà necessario diffondere le buone pratiche in atto su una scala nettamente più vasta di quanto non avvenga oggi nei 28 paesi dell'UE e adottare nuovi modi di pensare e di lavorare sul territorio. Sarà indispensabile promuovere e sostenere **la cooperazione, l'innovazione, l'imprenditoria rurale e il trasferimento delle conoscenze**.

Sarà importante pianificare come **combinare tra loro diverse Misure dei PSR in pacchetti a sostegno di sistemi integrati** volti al conseguimento di specifici risultati; altrettanto importante sarà il ricorso a strumenti finanziari, analizzando in particolare come questi possano sostenere **piccoli investimenti a livello locale**.
