

## Villaggi intelligenti

“Villaggi intelligenti” è l’attuale sottotema del lavoro tematico di più ampio respiro della RESR “[Zone rurali intelligenti e competitive](#) [1]”.

Un gruppo tematico (GT) analizzerà questo argomento dal settembre 2017 al luglio 2019.

Nel suo primo anno di attività, il GT ha esplorato idee e iniziative volte a rilanciare i servizi rurali attraverso l’innovazione digitale e sociale. Ha esaminato soluzioni per potenziare e rendere più sostenibili i servizi rurali, quali ad esempio la sanità, i servizi sociali, l’istruzione, l’energia, i trasporti o il commercio al dettaglio, grazie all’impiego delle tecnologie dell’informazione e della comunicazione (TIC) e a progetti e azioni locali di tipo partecipativo.

Nel secondo anno, dal settembre 2018 al luglio 2019, il GT fungerà da cassa di risonanza per la definizione di una guida pratica sull’utilizzo di tutti gli strumenti strategici atti a favorire la nascita e lo sviluppo di villaggi intelligenti. Al contempo, continuerà a fungere da piattaforma di collegamento tra le varie iniziative in corso, a riprova del crescente slancio e interesse che questo tema suscita a tutti i livelli.

Il GT contribuisce all’[Azione dell’UE per i villaggi intelligenti](#) [2] favorendo gli scambi su soluzioni innovative per la creazione di zone rurali più dinamiche, sostenibili e attrattive e analizzando come ottimizzare a tale fine i [Programmi di sviluppo rurale](#) [3] (PSR), la [politica di coesione dell’UE](#) [4] e altri strumenti finanziari.

Le informazioni sugli incontri del Gruppo tematico e le relative realizzazioni saranno pubblicate periodicamente su questa pagina.
