

## Perfiles de las RRN

Las redes rurales nacionales (RRN) operan en cada uno de los Estados miembros para apoyar y promover los objetivos de desarrollo rural definidos en los diferentes programas de desarrollo rural (PDR). Las RRN permiten y facilitan el intercambio y el aprendizaje entre todos los socios que participan en la implementación de la política de desarrollo rural: autoridades públicas, interlocutores económicos y sociales y los organismos relevantes en representación de la sociedad civil.

Más abajo podrá consultar documentos con perfiles de las RRN, que contienen la información principal sobre la estructura y funcionamiento de dichas redes y sus unidades de apoyo a la red (UAR). Los perfiles incluyen secciones dedicadas a los principales objetivos, los socios, la gobernanza, el presupuesto y las actividades de comunicación y autoevaluación de las RRN.

**2014-2020 NRN Profile**  
**Austrian Rural Network**

European Network for Rural Development

netzwerk  
zukunftsraum  
land  
LE 14-20

"Informing. Networking. Innovating. Inducing."

**NRN objectives**

Austrian Rural Development Programme set five main objectives:

- Building awareness of the challenges of the rural areas
- Facilitating new innovative solutions
- Wide participation in the implementation of the RDP
- Reflection of learning experience and improvement of the RDP 2014–2020
- Strengthening the skills needed for programme measure implementation

**Structure of the NSU**

There is one national NSU in Austria. The Austrian NSU consists of five partner organisations, specialising in different fields to cover all of the topics of rural development.

**Membership**

The Austrian Rural Network has an informal membership process. The network targets different stakeholders by designing different kinds of activities: some of them are open for all interested people; some are specialised and addressed mainly to specific stakeholders and experts.

**Who can join the network?**

The addresses of interested stakeholders are collected and clustered by the Network's most relevant working areas: agriculture, forestry and value chain, environment, nature protection and climate change, LEADER/CLLD and innovation. Stakeholders are informed through newsletter, website and magazines.

**How to get involved**

The network is open to receive suggestions from stakeholders on themes or projects to address issues in each working area. These are discussed with the NSU management team, which decided whether to include additional sub-projects into annual action plan.
