

## EP Intergroup on Smart Villages

**A new European Parliament (EP) Intergroup on [Smart Villages for Rural Communities](#) [1] was launched in July 2019, at the initiative of MEPs Franc Bogovic and Engin Eroglu.**

The aim is to enable exchanges on innovative ways to create vibrant and attractive communities in sparsely populated, mountainous and rural territories. Building on the achievements of the RUMRA Intergroup (2014-2019), this group will be a forum to discuss policy ideas and push for a [Smart European Rural Agenda](#) [2].
