Financial Instruments for rural development

A new publication [1] by the advisory platform fi-compass [2] explores the implementation of the European Agricultural Fund for Rural Development (EAFRD) through Financial Instruments, based on practical experiences in EU Member States.

The study examines the preparatory work done by Managing Authorities, the legal framework and its impact on the implementation of Financial Instruments, and how these have been programmed in the 2014-2020 Rural Development Programmes (RDPs).
