

Promoting Romanian forests as cultural and natural assets

The Association for Environment and Development - [ADEMED](#) [1], Romania supports three villages in reviving traditional community celebrations in the forest.

The Administration of National Cultural Fund, Romania, supports a five-month project by ADEMED to promote folkloric theater in Bosorod, Pietriceaua and Pesac, three settlements in the Carpathian Mountains. Between June and July 2021, cartoonists, actors, teachers and residents team up to translate three local legends into comics and then perform them in the forest.

The villages seed to form a network promoting the forest's cultural role and raising awareness of their role as cultural and natural local assets, promoting their conservation.
