## [Italian winegrowing hills added to the UNESCO World Heritage List](#) [10]

**Le Colline del Prosecco di Conegliano e Valdobbiadene, a hilly landscape in Veneto (north-eastern Italy), have recently been added to the [UNESCO World Heritage List](#) [11].**

The site includes part of the vinegrowing landscape of the Prosecco wine production area. The landscape is characterized by 'hogback' hills, *ciglioni* – small plots of vines on narrow grassy terraces – forests, small villages and farmland. For centuries, this rugged terrain has been shaped and adapted by man. Since the 17th century, the use of *ciglioni* has created a particular chequerboard landscape consisting of rows of vines parallel and vertical to the slopes. In the 19th century, the *bellussera* technique of training the vines contributed to the aesthetic characteristics of the landscape.
