Farmers measure water - Netherlands [2]

Keywords:

Agriculture, Cooperation, Digitisation, Rural Inspiration Awards: nominees, Water management

Countries:

The Netherlands

This project combined state-of-the-art sensing techniques and models with a participatory monitoring process with farmers and water authorities to create a common understanding of the main local challenges and possible solutions to enhance water quality. In addition, the process empowered individual farmers to become equal partners with water authorities as they gained knowledge and access to data. Problems with water management differ between regions, but the process of jointly collecting, learning from and acting on data can be applied across regions.
