

## Sequestering carbon in soil and retaining soil carbon stores - Orientations for CAP Strategic Plans

Sustainable use and management of land and soils is at the heart of a sustainable and carbon neutral bioeconomy. This document, prepared in the context of the ENRD thematic work on [Bioeconomy and climate action in rural areas](#) [1], provides lessons learnt from the 2014-2020 Rural Development Programmes and ideas for the CAP Strategic Plans.

**Publication date:**

January, 2020
