Rural responses to the COVID-19 crisis

The outbreak of COVID-19 has significantly affected all aspects of life across Europe. In addition to threatening our health, the pandemic is also posing serious challenges to our socio-economic systems. In rural areas, farmers, businesses and communities are particularly affected.

This page provides examples of projects and initiatives primarily launched by rural communities in coping with the COVID-19 emergency, supporting rural businesses and fostering solidarity with those more vulnerable in this exceptional situation. It also provides information about European Commission initiatives and actions aimed at alleviating the current difficulties faced by rural Europe.

We invite you to share your experience and projects! Please send your contributions via our tool Share your rural story [1].

**EU response**

The European Commission is coordinating a common European response to the COVID-19 crisis, not only to support the healthcare systems of the EU Member States, but also to mobilise resources to support businesses hit by the crisis, including farm holdings, agri-food companies, and rural businesses. Find out more about the coordinated EU response to COVID-19 [here](#).

- **Agriculture and Rural Development (DG AGRI) webpage** [59] on EU response to COVID-19, supporting farmers and rural areas.
- **Factsheet** [60] 'CORONAVIRUS: Emergency response to support the agriculture and food sectors'.

The European Commission proposed on 26 May 2020 a major recovery plan [61] for Europe based on harnessing the full potential of the EU budget while aligning with the principles of the EU Green Deal and the European Digital Agenda.

The recovery plan aims at supporting Member States to recover, repair and emerge stronger from the crisis, kick-starting the economy, helping private investment and addressing Europe’s strategic challenges. The recovery plan combines the 2021-2027 Multi-annual Financial Framework [62] (MFF) and Next Generation EU [63], a temporary recovery instrument.

Specific measures to support farmers, agri-food companies and rural businesses

**CRII+**

As part of the 'Coronavirus response investment initiative plus' (CRII+), the European Commission announced a new set of measures specifically addressed to support farmers and rural areas, by allowing further flexibility in the use of structural Funds and the EAFRD, and extending the deadline for CAP payment applications until 15 June 2020. Read more here [64].

**Increased state aid**

With the adoption of the Temporary Framework for state aid rules, the European Commission is also allowing farmers and agri-food companies to benefit from increased state aid to face this unprecedented situation. Find out more about the Temporary Framework for state aid measures. Read more here [65].
Measures to support the food supply chain

The European Commission in close cooperation with EU countries is also committed to ensure the mobility across the Member States of seasonal workers critical to the agricultural sector and the non-stop functioning of the single market: special green lanes have been created to facilitate border crossing checks for all goods, including agri-food products. Read more here [66].
