# Experiences of multi-funding on the ground in Sweden

A minor study made by Petra Kessler

- **Deep interviews with CLLD manager and chairmen, EU regional program coordinator at the regional and national level and I have attended the Swedish national CLLD conference in September this year.**

*"We believe that the CLLD method is a fantastic method to manage projects, local support, tri-partnerships [...] why should we not be able to apply it to social projects and growth of entrepreneurial projects?" (CLLD Manager)*

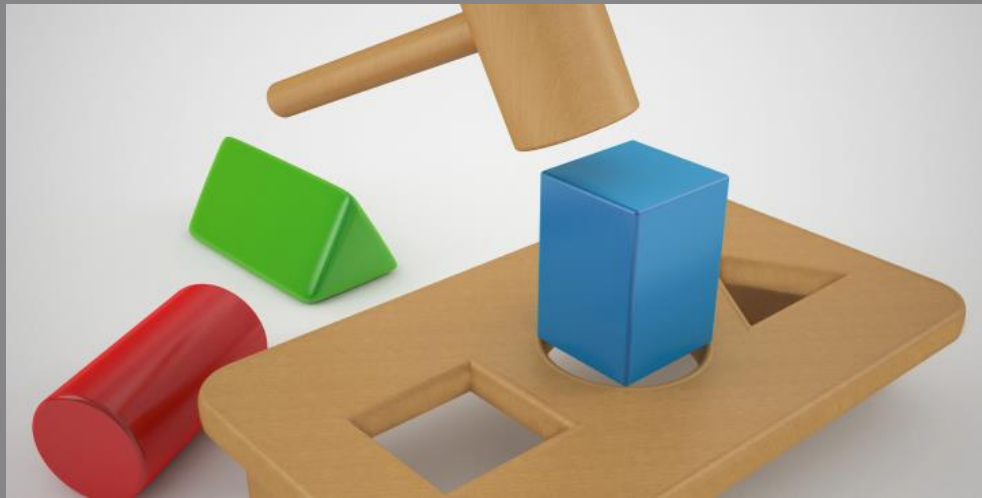

Sveriges lantbruksuniversitet

***"Multi-Fund gives us an opportunity for 100%  
development in a community"***  
**(CLLD Manager)**

**Different projects that together build a strong  
overall development.**

- **Heavy administration, new and tuff regulations & coordination takes time.**
- **But they believe in the method and the bottom-up approach.**

***”The people who are working with CLLD are the world’s best problem solver, if you don’t like to work with problems- you cannot work with this”. (CLLD Project administrator)***

- Strategies and fund goals
- Bottom-up approach and innovation
