

In your opinion, where does widening stakeholder engagement add the most value to LEADER work?

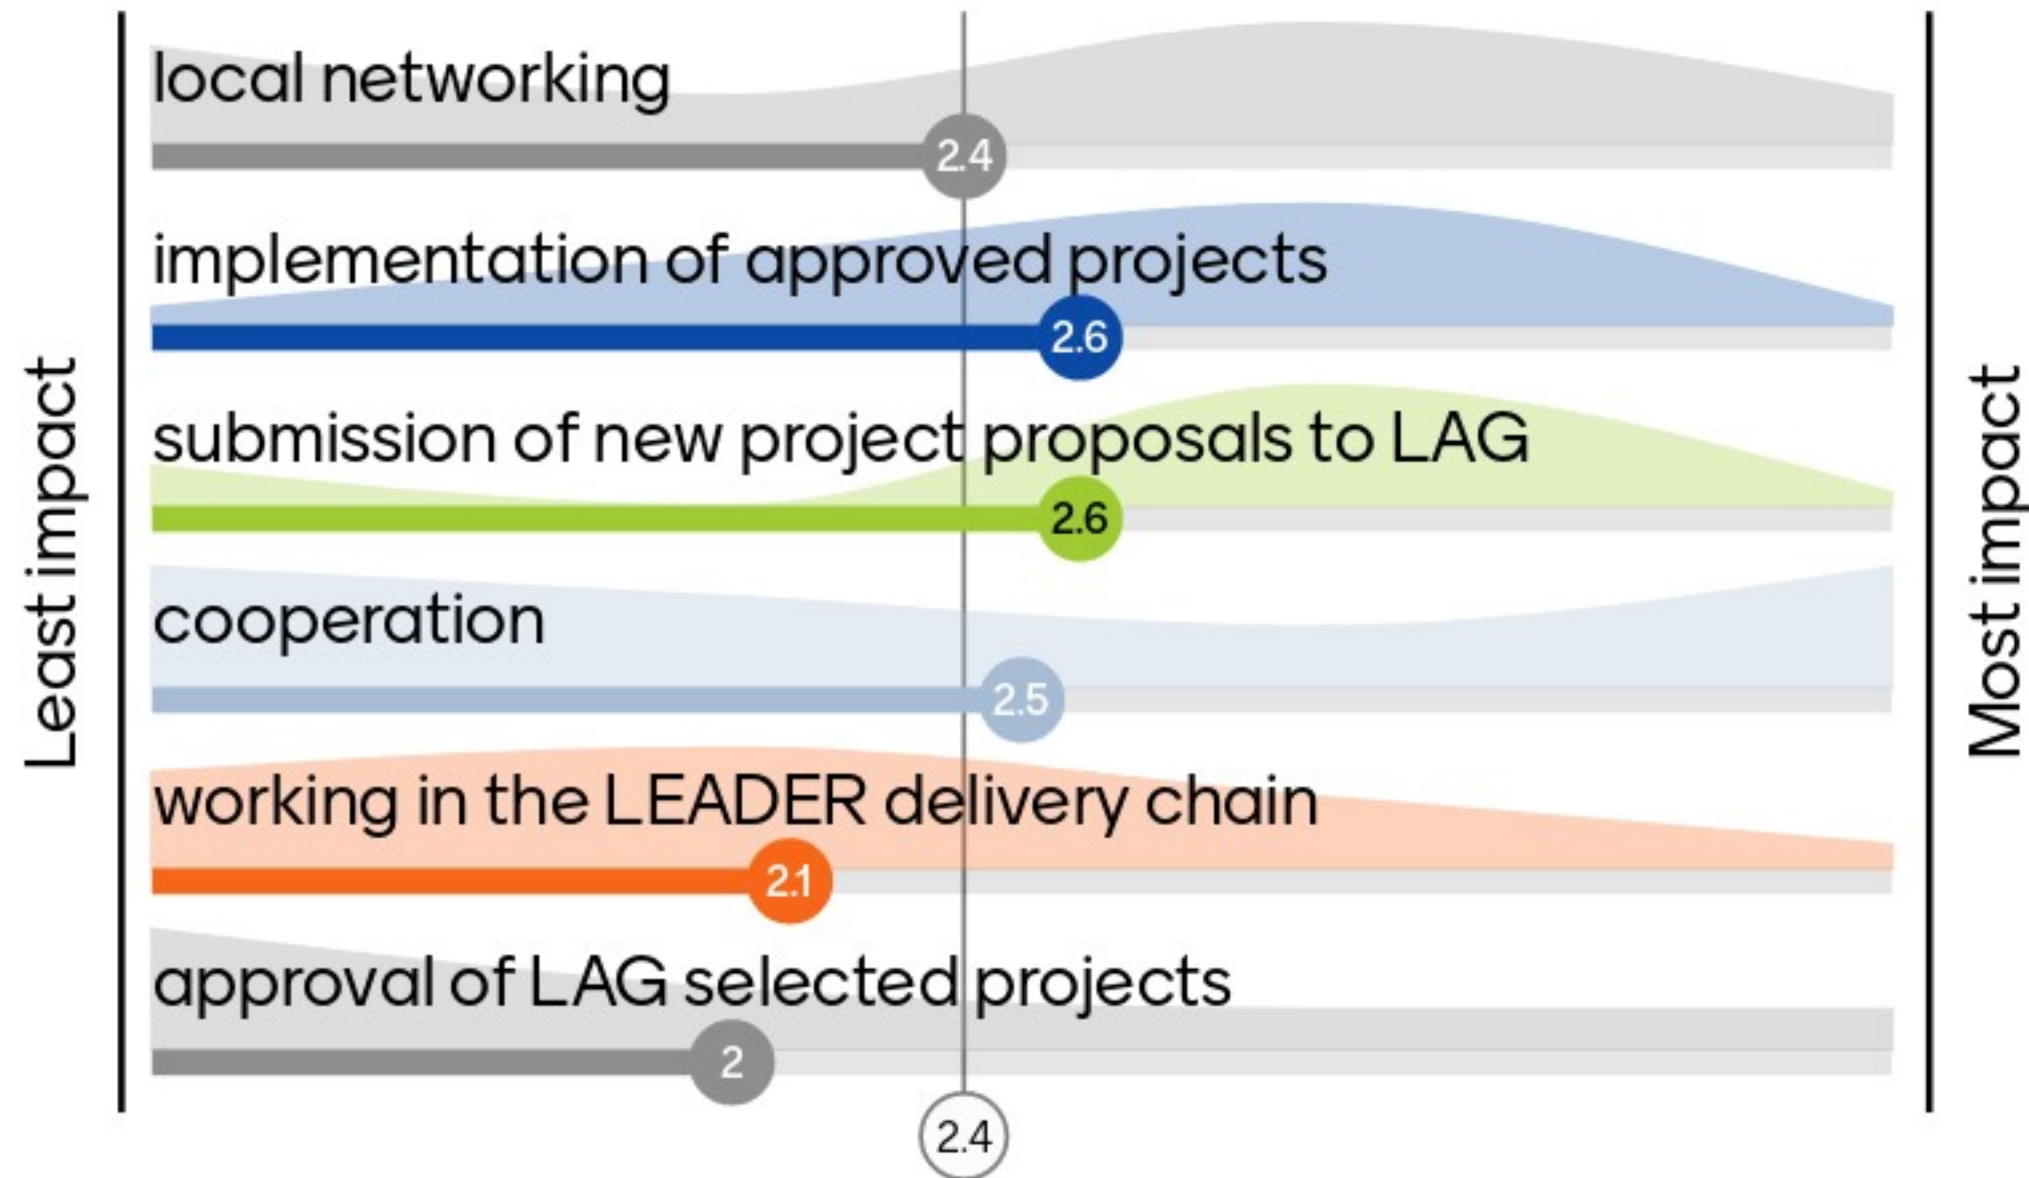

How big is the impact of COVID-19 on LEADER areas in your Member State, overall?

How would you characterise the degree of impact of COVID-19 on LEADER implementation in your Member State?

In which field of LEADER work is the impact of the crisis most felt?

How can 'more' stakeholder engagement improve the resilience of local rural communities?

Improve the digital literacy

because it's a great source of innovation!

The more stakeholder engagement, the stronger we are as a community

Working together for the same cause connects people and they start looking at the common good in their communities.

regularly online meetings, keep stakeholders updated

Not enough just to declare that "We are open!". Involving is serious work but also to make newcomers feel comfortable. COVID-time brought lots new people to follow our on-line open Webinars! More than 50 per cent new names!

The stakeholder involvement is not the problem. the problem is failing financial means and heavy administration

To develop better LDS to address all area's needs..

Local communities know better their potential and problems . more engagement means a stronger voice and a better and stronger identifying of solutions and implementation.

How can 'more' stakeholder engagement improve the resilience of local rural communities?

It helps communities to learn from each other. It helps to activate communities. It stimulates communities to organize projects and initiatives.
