Examples of expected achievements

- RDP support will aim to reduce the harmful environmental impacts of agricultural activities on the soil, surface and ground water and air by promoting the use of environmentally-friendly practices and taking care of growing conditions. More than 81 % of agricultural land is expected to come under management contracts to improve water management.
- Service innovations and a new kind of enterprise promotion in sparsely populated areas are needed, as well as more local, neighborhood-oriented activity and participation. The net population benefiting from the improved services is targeted to be 1.8 million.
- Measures are foreseen to support the diversification of agriculture-related businesses. The aim is to influence producers' capacity to respond to consumer demand for organic and local food, to improve the availability of their products and to increase the degree of processing.
- Towards enhancing sustainability and raising awareness of environmental issues as well as energy and resource efficiency, the RDP is seeking to increase the share of renewable energy and more efficient use of manure.
- Support will aim to develop and raise agricultural productivity and competitiveness by improving the structure of agricultural production and seeking to improve the age structure of farmers.

Examples of key challenges

- The main challenges for agricultural activities in Finland relate to the low profitability of the agricultural sector due to cold climate and poor soil, i.e. the natural constraints.
- The negative impact of agricultural activities on the environment include eutrophication of the water bodies, deterioration of natural habitats and reduction of species.
- About 42 % (nearly 118 000) of all enterprises operating in Finland are located in rural areas. In 2010 about 93 % of enterprises were defined as "micro sized", employing not more than 9 persons.
- Finnish agriculture is still based mainly on the family-farming type of agriculture. The number of farms is relatively high and the farm size relatively small.

3. Planned expenditure per priority

The following table shows how the planned total public expenditure (comprising the EAFRD support and the national contribution) is allocated between rural development priorities. Priority 1 is considered to be cross-cutting and no separate financial allocation is shown as the expenditure is distributed across other focus areas.

| Priority | Total public expenditure per priority (million EUR) | % of total public expenditure* | |

| | P6 - Social inclusion & local development | 762.0 | 9.2 % |

* Figures do not add up to 100 % because the budget for technical assistance is not included. The budget for technical assistance is available in Section 4.

4. Planned expenditure per measure (million EUR)

The following chart shows the indicative planned total public expenditure per measure (comprising the EAFRD support and the national contribution). The measures illustrated in the chart are the complete list of measures selected within the RDP. Measures in color light gray were not selected by the region.

5. Choice of measures by priority and focus areas

The following chart shows which priorities and focus areas are selected in the RDP and the combination of measures used to address them. For each measure the budget breakdown per focus area is given. Priority 1 is considered to be cross-cutting and no separate financial allocation is shown as the expenditure is distributed across other focus areas. Expenditure under Priority 4 is programmed for the priority as a whole, not for individual focus areas.
