### Brief summary of the project idea (max 800 characters)

The general aim of the cooperation project is to raise the awareness of residents of the area about the protection of the environment through the organization of promotional and educational events. The project will consist of the dissemination of opportunities and benefits of different methods of environmental protection, such as renewable energy sources, the use of eco-friendly solutions in the farms and the waste segregation. Partners working together, organize joint projects and exchanging knowledge and experiences in this regard, will reach a larger number of residents, promote renewable energy sources and the benefits of waste segregation better, and to engage young people in environmental activities.

The main activity of the project is to create by all cooperation partners "internet stalls" showing the use of different ways to protect the environment and landscape as a form of dissemination of knowledge. The role of this stall will be showing the information on websites about environmental protection. "Stall" will be activate local society through different, open, pro-ecological contests.

LAGs, involved in the project, will set up a commission that will evaluate the competition works and application of "good practices" in the ecological action. In this way will raise up a map of good solutions in way of environmental protection on areas of our LAG.

Each LAG partner will prepare "stalls" as bookmarks for web pages that will be mutually fit together. One of the forms of mobilization of society will be prizes for participants of the project.
